

Search for your mastercoin address

Repeat for all the addresses you want in your wallet

Click „Add to wallet“ from address page.

Load addresses from wallet

Verify sender address

Swap to advanced view of send form (for Base58 and json fans ;-)

Prepare a transaction

Load private key from wallet using password

OR Enter private key

Sign the transaction (click send button to broadcast the transaction)

(only in Advanced View) Open offline transaction signing form

Restore wallet from backup (copy&paste wallet backup here)

Backup wallet to text file (save wherever you want)

Cloud storage not supported in current version

Create password to support private keys functions

Remove address from wallet

Set / Edit name for address

Set / Edit Private Key (password needed)

View last 10 transactions related to address

Drag and Drop to re-order addresses

Click to swap between address / name presentation

Click to swap between currency / USD presentation

Click to send from address

Use the same wallet (\_exactly\_ the same pages) on any modern device on any available screen resolution

**Thank You!**
